

## Millers Oil & Jipocar Racing Team

Statements of Mr. Radek Scensny (Engineer) and Mr. Quirin Müller (Team Manager) of Jipocar Racing Team.

**Radek Scensny:** “ Jipocar Racing Team is using Millers Oil products since the year 2010 and tested them on WRC events like Sweden, Mexico, New Zealand, Estonia, Finland, Germany and Japan. After every Rally we rebuild and check our parts on the car and we can confirm a minor attrition on the engine and transmission parts. The products of Millers Oil are convenient for us.”

**Quirin Müller:** “A high-tech racing car requires high-tech products. One of the key factors is for sure oil. Millers Oil provides us exactly the products which we need for driving in the rough conditions of the World Rally Championship. Through the new nano technology we archive lower temperatures of gearbox and differentials which is mainly on hot events a big advantage in comparison to other oil suppliers.”
